TECHNICAL SKILLS:

- Backend: Java
- Frontend: HTML, CSS, Javascript & XML
- Database: SQL
- SAPUI5 Framework (MVC, XML Views, Controls, Models, Data Binding), SAP Web IDE, creation of SAP fiori applications.

PROJECTS:

- **Decision support system of e-commerce agricultural products based on blockchain:**
Online ecommerce application [Using Python, HTML, CSS, Javascript & MySQL]
 - It enhance traceability, security, and efficiency in the agricultural supply chain. By leveraging blockchain's immutable ledger, the system can track every step of the agricultural product's journey, from the farm to the consumer, ensuring authenticity and quality. This can also lead to greater transparency and trust between producers, retailers, and consumers.
- **Spinning Bottle: Gaming Application [Using XML and Java]**
 - A Spinning bottle game on a mobile application was developed by using XML for the user interface and java for the applications logic. The game can be used for entertainment or as a tool to randomly select a person or item.
- **SAP MM and SD Projects:**
 - Developed custom SAP Fiori/UI5 applications tailored to SD (Sales Order Management, Delivery Processing) and MM (Purchase Requisition, Goods Receipt) processes.
 - Integrated SAP UI5 frontend with OData services from SAP ECC for real-time data consumption in SD and MM modules.
 - Worked with functional consultants to understand business processes in SD and MM and translated them into user friendly UI applications
 - Implemented features such as file attachments, date pickers, dynamic table, and value helps in line with MM/SD use cases.
 - Enhanced standard Fiori and UI5 applications and extended them using the SAP web IDE.

CERTIFICATION:

- Web application development with dot net
- Java full stack developer
- Freecodecamp
